Pages DRS-9 to DRS-11, and DSS-7 and DSS-8

- Optional Features, No Charge – Specify on Order:
  - Old Information: N/A
  - New Information: **Cord length override (IB and OB shades)**

#### • IMPORTANT Note:

- Old Information:

In accordance with the revised American National Standard for Safety of Corded Window Covering Products, shades with beaded cord loops require proper mounting of the cord tensioner for the product to function properly. The cord tensioner should not be modified in any way.

- New Information:

In accordance with the revised American National Standard for Safety of Corded Window Covering Products, shades with beaded cord loops require proper mounting of the cord tensioner for the product to function properly. **The cord tensioner is a safety feature designed to make cord loops less accessible to young children.** The cord tensioner should **always be properly mounted and** not be modified in any way.

**Note: If the cord length override is ordered longer than the shade on an inside (IB) mount, there is a possibility that the beaded cord could potentially damage the window sill during use.**
