Provenance® Woven Wood Deductions Explained

Outside mount (OB) deductions recently published in the May 2010 issue of the Hunter Douglas Price and Reference Guide (PRG) reflects a change as it relates to deductions. **Please note:** the published 'Finished Width' refers to the greatest width on any shade and the 'Fabric Width' refers to the body of the shade.

OB Shades: Prior to May, the 'Finished Width' for all OB shades was 5/8" wider than the 'Ordered Width'. Because these shades were larger than ordered, there were a number of remakes. As of May 2010, the standard for OB woven wood shades is the 'Finished Width' which equals 'Ordered Width'.

Prior to May, the 'Fabric Width' for all OB shades was equal to 'Ordered Width'. As of May 2010 the 'Fabric Width' for all OB shades is now 'Ordered Width' - 5/8".

IB Shades: The 'Finished Width' for IB shades **without** Valance Returns is 'Ordered Width' -1/2" and the 'Fabric Width' is 'Ordered Width' -1/2". The 1/2" deduction allows 1/4" on each side of the shade for smooth operation.

The 'Finished Width' for IB shades **with** Valance Returns is 'Ordered Width' -1/2" and the 'Fabric Width' is -1 1/8". The additional 5/8" deduction on IB shades with Valance Returns is necessary for the shade to fit between the Valance Returns.

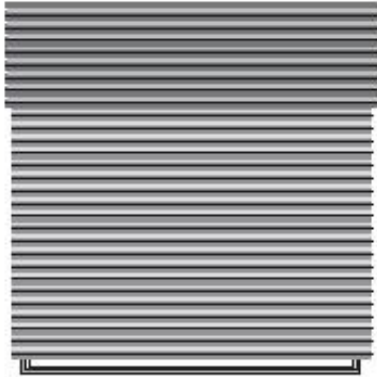

For further clarification, please refer to the chart and illustrations below.

Shade Configuration	Finished Width	Fabric Width
Outside Mount with Valance Returns	Ordered Width	Ordered Width -5/8"
Inside Mount without Valance Returns	Ordered Width -1/2"	Ordered Width -1/2"
Inside Mount with Valance Returns	Ordered Width -1/2"	Ordered Width - 1 1/8"

OB Shades with Valance Returns

Prior to May 2010

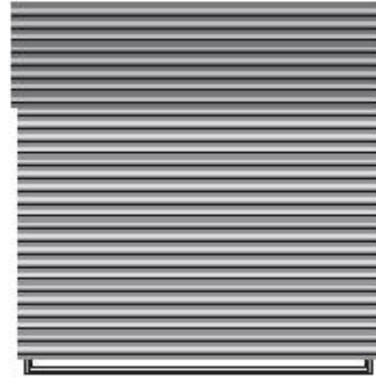

Finished Width = Ordered Width + 5/8"

Fabric Width = Ordered Width

After May 1, 2010

Finished Width = Ordered Width

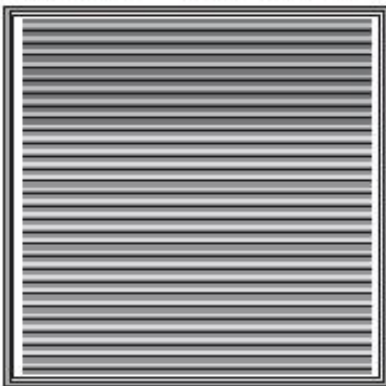

Fabric Width = Ordered Width - 5/8"

IB Shades

Without Valance Returns

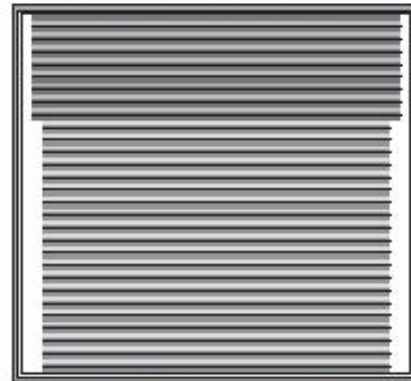

Finished Width = Ordered Width - 1/2"

Fabric Width = Ordered Width - 1/2"

With Valance Returns

Finished Width = Ordered Width - 1/2" (allow for a 1/4" gap on each side)

Fabric Width = Ordered Width - 1 1/8" (fabric is 5/8" less than finished width)
