

# PIROUETTE® WINDOW SHADINGS

BOTTOM FABRIC PANEL OPTION

## BOTTOM FABRIC PANEL OPTION FOR OUTSIDE MOUNTS

Now instead of a flat fabric panel at the bottom of the shading, we're offering a Zero Bottom Panel option for outside mounts, which eliminates the flat panel and turns it into an operable bottom vane.

- Eliminates the flat fabric panel at the bottom of the shading
- Becomes an operable bottom vane
- Lengthens the shading up to 5"
- The final length of the shading is dependent on the amount of fabric necessary to make the last vane operable
- Submit height dimensions as you normally would and the factory will adjust the height accordingly
- Exact drop of shading cannot be predicted at time of order
- Available for outside mounts only
- Retail surcharge per shading

**BEFORE:**  
OUTSIDE MOUNT WITH  
FLAT FABRIC PANEL

**AFTER:**  
OUTSIDE MOUNT WITH  
A ZERO BOTTOM PANEL

The flat panel of fabric becomes a longer, operable vane.
